“Insurance Claims – What They Can Teach Us”
**Presented by Mike Adams, Sr. Vice President, Underwriting
Avemco Insurance Company**

Learn about the 6 most common causes of loss from a review of Avemco claims data and various personality traits of pilots that may lead them to having an accident or not having one. The personality traits information is from a study partially funded by Avemco, conducted by Dr. Bill Rhodes. Dr. Rhodes dissected claim files of fatal accidents, talked to pilots, instructors, and insurance underwriters to see what common traits accident pilots possessed vs. traits of pilots that had not had an accident. The end result of the study and this presentation is to help pilots identify areas of training and traits that may contribute to having an accident.
