About NAFI

Founded in 1967, the National Association of Flight Instructors (NAFI) is dedicated to raising and maintaining the professional standing of the flight instructor in the aviation community. By focusing on developing tools, programs, content and strategies specifically for flight instructors, NAFI-member CFIs around the world represent the best of the best.

NAFI not only serves the full spectrum of flight instruction, it also maintains the finest benefits package available for everyone from the independent instructor to those teaching in flight schools. Flight instructors are truly the “teachers of flight” and the front line for “quality control” in aviation. That is why NAFI provides members’ access to products and services designed to reinforce their ability to instruct with confidence.

CFIs influence active pilots daily: current pilots training to maintain proficiency by advancing their skills with new ratings or certificates and students seeking an initial pilot certificate. Membership in NAFI not only provides instant recognition as a true CFI professional, it also fosters confidence among students.

Serving as the voice of flight instruction, NAFI represents the flight training community in testing and training standards, governmental oversight and engages in regular interaction with the aviation community. NAFI works closely with the FAA, TSA, NTSB, other agencies, associations and industry leaders advocating for the flight instruction community.
